

40-30 Engineering Solutions to improve your productivity & optimise your maintenance

SOLUTIONS PROVIDER

Maintenance solutions & strategy
Procedures and process
Design & manufacturing of sub-assemblies
Production & laboratory equipment
Design of leak test equipment

INTERNATIONAL PROJECTS

CERN, Geneva, Switzerland
Laser Megajoule, Barp, France
X-Fel, Hamburg, Germany

SOLUTIONS FOR YOUR APPLICATION

- **Production and laboratory equipment**
Upgrade, modification, refurbishment, automation, reliability, standard compliance.
- **Design of customized vacuum pumping station**
- **Design and manufacturing of test benches, tools and specific sub-assemblies**
For maintenance, test, analysis, diagnostic support, training.
- **Procedures and process**
Designing procedures to test and inspect components or equipment (NDT COFREND certified personnel according to standard ISO 9712 & EN 4179).
Designing procedures for decontamination, ultra-cleaning & outgassing techniques.
- **Reliability of sub-assemblies and equipment**
FMEA approach, re-engineering.
- **Advice in maintenance strategy**
Methodology, program, frequency, level of integration.
- **Maintenance solutions**
Workshop design, staff training, tool design, methodology & implementation.
- **Designing of maintenance procedures**

EXAMPLES OF PROJECTS DESIGNED BY 40-30

CERN

Large Hadron Collider (LHC), Geneva, Switzerland

- Helium leak test on QRL (27 km)
- Interconnections in the tunnel: 43 000 welds tested (354 leaks detected)
- Assembly and alignment of over 2 km of UHV pipes
- Ultra high vacuum, international environment

LMJ

Laser Megajoule, Barp, France

- Outgassing measurement to analyse the organic pollution
- Cleaning procedure for the mirrors
- Tightness control
- Ultra clean environment

X-Fel

The European X-Ray Free-Electron Laser, Hamburg, Germany

- Assembly of cryogenic modules
- Specific materials (ISO 5)
- Ultra clean environment
- Specific seals, parts and design

Design of leak test equipment

- Facility to be tested
- Stainless steel pool liner of a nuclear plant
- Constraint
- Nuclear environment, depth of 12 meters, under water
